Use Case: Enable Password Reset

Admin   : System   : Database

Note that I included the beginning steps for logging in at the beginning of the SSD because the check for admin usage should happen when the Admin user logs in.

selectLogin

presentLoginScreen

login("admin", password)

verifyId("admin",password)

idValid

loop [while not idValid]

requestValidId

login("admin",password)

verifyId("admin",password)

idValid

loop [while not logoutPressed]

presentAdminScreen

enableReset(user)

displayConfirmationPrompt

okayClicked

createTempPassword(user)

password

displayPassword

okayClicked

presentAdminScreen

logout

presentWelcomeScreen
